

Uppdatering: 2020-07-29 gällande AFT/CTT

Hej!

Jag skickar ut denna uppdatering för dig som har valt att gå med i AFT/CTT eller som är på gång just nu med att komma igång med AFT/CTT.

Kommer löpande försöka att förmedla den viktigaste informationen från AFT/CTT.

*** Uppdatering från CTT gällande aktuell DD**

Det är den här trade som gör att vi just nu har mycket röda siffror, öppna trades gällande valutaparet USD/JPY.

Vi behöver se att USD stärks.

Det här officiellt uttalande direkt från CTT gällande denna DD.

USDJPY – Trade Update

The current position has seen drawdown on the EA in the region of 30%. The EA has seen these levels in the past and has managed to successfully close positions in a profit.

You will be aware there is a hedging system built-in into the EA which can be initiated at any point once all the set parameters have been met (this is an automated system), there is the possibility that we could see a hedge of this trade at some point if the market continues to move against the position.

In the event a hedge is used you will notice that any current Stop Losses and Take Profits will be adjusted by the EA and you may also notice pending orders on your accounts. These are all features of the EA and the hedging system and should not cause unnecessary panic.

We will continue to update you throughout the day whenever we can and in the event that a hedge is placed we will post a screenshot of an account that will show any changes that will appear on your MT4.

We hope the above is self explanatory and that you will all respect that support will do their best to answer any generic queries but cannot make further comment regarding the hedging system or this statement.

Har du frågor kring detta vill CTT att man kontaktar dem på support@celestialtt.com

Med vänlig hälsning

Mikael Eriksson
