Viktig information om Baccarat Staking!

För dig som följer Baccarat Staking via Telegram har redan fått detta meddelande, men för dig som inte gör det så var det den här informationen som kom ut igår:

In the night from January 25, 2022 to January 26, 2022, the MICH token on the Binance Smart Chain was successfully attacked by hackers and liquidity was withdrawn. We are currently unable to assess the overall situation. The attack was noticed relatively early. But damage has definitely been done that affects every backer as liquidity is and has been a part of all our stakes. We are working on a recovery plan and how we can all work together to put the money that was stolen back into the stake.

Deposits and withdrawals with MICH tokens are currently blocked for the time being. We are also working on solutions here and hope for your understanding. Currently, payouts can only be made via the cash pools (eWallet to eWallet). Depositing through the third-party provider with other cryptos will still work. In general, however, a new solution will have to be found here for the future in order to avoid such attacks in the future. Here, too, we ask for your patience until we announce the new strategy and the new path.

In the meantime, our players will continue to play, because of course they still have their respective stakes of about 6% per player and everything else will continue as before, of course your stakes will retain their current value. As soon as we have news and/or further plans as to what we are doing, we will of course let you know. Stay Strong!

Sedan kom även detta meddelande...

The hack of our MICHI token. What exactly does that mean for everyone? So the MICHI token contained a large proportion of the stakes, namely the part that was ready for payment at any time. That was the idea and the concept behind it. Thus, the part that was already available for payment was put into the liquidity of the coin at Pancakeswap. Exactly this liquidity was stolen by a hack. This happened in block 14691376 and is publicly visible to everyone in the BSC. The exact damage has yet to be quantified, since the liquidity was always added in BNB Coin and this has also been subject to strong price fluctuations in recent weeks. What happens now? Some backers made suggestions and these were passed on to management. All suggestions are being discussed and there will be a quick decision in the coming days. In fact, there will be some adjustments. For the time being, as you may have noticed, both deposits and withdrawals in the back office are not possible. This means that anyone who currently wants to buy a new stake can only do so with the help of an existing backer. A so-called e-wallet to e-wallet transaction. Likewise, a payout is only possible in this way. We know that there are still many unanswered questions and we ourselves are working flat out to find a solution. It is clear that there will be changes to form a so-called recovery pool, which is intended to compensate for the damage that has occurred. More on that in the coming days. How it was or is technically possible for a wallet to withdraw liquidity even though it has never added it is so far absolutely unclear. But the fact is that something like this can happen again at any time and we therefore need a different solution. We must now look forward together and work on solutions. As always, we wish you the best of luck...

Man har alltså blivit hackade och bestulna på MICHI coins.

Spelen kommer att fortsätta som möjligt. Den summa som du har i stake ligger kvar som tidigare.

Men både nya insättningar och uttag är stoppat tills vidare.

Företaget arbetar nu med att snabbt få fram en ny action och recovery plan.

Det diskuteras bland annat att helt gå ifrån användandet av den egna kryptovalutan MICHI och gå över till någon kryptovaluta.

Baccarat Staking använde från början Bitcoin.

Jag tror det skulle vara en mycket bra lösning om man gick tillbaka till BTC eller någon av de andra mer kända kryptovalutorna, exempelvis BinanceCoin (BNB).

Användandet av MICHI har bara gjort saker mer komplicerat.
Vi får helt enkelt invänta ny information från företaget.

OBS!

Jag har ju hjälpt många av er de senaste månaderna med växlingen från MICH coins till BTC vid uttag.

Men då alla uttag för närvarande är stoppade så kan jag givetvis inte längre heller erbjuda denna tjänst.

Som sagt, förhoppningsvis går vi tillbaka till BTC och då kommer min växlingstjänst inte heller behövas.

Bra grupper att vara med i som har med Baccarat Staking att göra:
